Education

University of Bohol   June 2018 − June 2023
Bachelor of Science in Computer Engineering   *Tagbilaran, Philippines*

Projects

Ecommerce Website | *Source Code*
- Developed a fully functional e-commerce platform with **Vue.js** (frontend) and **Laravel 12** (backend) using **Inertia.js** for seamless SPA navigation.
- Built an admin panel to manage products, orders, and users efficiently, streamlining store management workflow.
- Implemented secure user authentication and authorization with **Laravel Sanctum.**
- Integrated **MySQL** database to manage product inventory, orders, and customer details.
- Enhanced UI/UX with **Tailwind CSS** for responsiveness and accessibility.
- Integrated **Stripe** payment gateway for secure online transactions

Task Management App | *Source Code*
- Built a task management system inspired by Asana using **Laravel 12** and **React.js** for role-based access, authentication, and collaboration.
- Built drag-and-drop task boards using **DndKit** for intuitive task organization.
- Used **Redux** for state handling and **Laravel Sanctum** for secure authentication.
- Designed a clean, responsive UI with **ShadCN** components.

Work Experience

Full-stack Web Developer   Sep 2023 − Dec 2023
BlendIT   *Tagbilaran, Philippines*
- Contributed to a data tracking system using **Vue.js** and **Laravel**, resulting in a **10%** increase in data accuracy for affiliate marketing revenue tracking.
- Improved backend functionality by integrating **PHP**, **Laravel**, and **MySQL** databases to handle **SQL** and **JSON** data, enhancing user interaction and data display.
- Synchronized product stock between two **WordPress** sites using the **WooCommerce** plugin and **Erply** inventory management system, reducing stock discrepancies by **25%.**

WordPress Developer Intern   Feb 2023 − May 2023
BlendIT   *Tagbilaran, Philippines*
- Designed and developed responsive web app prototypes using **Figma**, **HTML**, **CSS**, and **JavaScript**, aligning with design mockups and wireframes.
- Redesigned static web applications into dynamic **WordPress themes** with **ACF** plugin, resulting in a **40%** faster page load time.

Technical Skills

Languages: JavaScript, Php, C

Libraries/Frameworks: React.js, Vue.js, Inertia.js, Laravel, WordPress, Tailwind CSS

Developer Tools: GitHub, Docker, Jira, Asana

Design Tools: Figma, Framer

Database: MySQL
